1   A service-oriented monitoring registry
Bahman Kalali, Paulo Alencar, Don Cowan
October 2003 **Proceedings of the 2003 conference of the Centre for Advanced Studies on Collaborative research**
Publisher: IBM Press
Full text available: 📄 pdf(217.87 KB)   Additional Information: full citation, abstract, references, index terms

> Web services are software modules that expose their functionality over the Internet via well-defined interfaces. Although Web services are promising technologies in that they facilitate application-to-application communication over the Internet, they still rely on traditional distributed computing communication models such as the remote procedure call, in which a Web service requestor needs to have complete knowledge of a Web service provider interface. If a Web service requestor did not use the ...

2   Lightweight kernel/user communication for real-time and multimedia applications
Christian Poellabauer, Arsten Schwan, Richard West
January 2001 **Proceedings of the 11th international workshop on Network and operating systems support for digital audio and video**
Publisher: ACM Press
Full text available: 📄 pdf(240.90 KB)   Additional Information: full citation, abstract, references, citings, index terms

> Operating system enhancements to support real-time and multimedia appl ications often include specializations and extensions of kernel functionality, as with the kernel HTTP daemon (khttpd) in Linux, for instance. To enable efficient and flexible interactions of such extensions with user-level functionality, we have developed ECalls, a lightweight, bidirectional kernel/user event delivery facility, which not only supports the timely delivery of events, but it also reduces the cost and frequ ...

3   System performance and benchmarking: XCache: a semantic caching system for XML queries
Li Chen, Elke A. Rundensteiner, Song Wang
June 2002 **Proceedings of the 2002 ACM SIGMOD international conference on Management of data SIGMOD '02**
Publisher: ACM Press
Full text available: 📄 pdf(116.48 KB)   Additional Information: full citation, abstract, references, citings, index terms

> A wide range of Web applications retrieve desired information from remote XML data

1 Demonstrations: Augmenting and sharing memory with eyeBlog

Connor Dickie, Roel Vertegaal, David Fono, Changuk Sohn, Daniel Chen, Daniel Cheng, Jeffrey S Shell, Omar Aoudeh

October 2004 **Proceedings of the the 1st ACM workshop on Continuous archival and retrieval of personal experiences**

Publisher: ACM Press

Full text available: 📄 pdf(2.77 MB)   Additional Information: full citation, abstract, references, index terms

> eyeBlog is an automatic personal video recording and publishing system. It consists of ECSGlasses [1], which are a pair of glasses augmented with a wireless eye contact and glyph sensing camera, and a web application that visualizes the video from the ECSGlasses camera as chronologically delineated blog entries. The blog format allows for easy annotation, grading, cataloging and searching of video segments by the wearer or anyone else with internet access. eyeBlog reduces the editing effort o ...

1   Technical and social components of peer-to-peer computing: An end-user perspective on file-sharing systems

Jintae Lee

February 2003 **Communications of the ACM**, Volume 46 Issue 2

Publisher: ACM Press

Full text available: 📄 pdf(91.50 KB)   Additional Information: full citation, abstract, references, index terms
📄 html(25.44 KB)

P2P file-sharing systems enable their users to share files directly among themselves without the need for a central file server. They form one of the most well-known categories of P2P systems, thanks largely to the Napster controversy and its appeal to the large potential user base. At its peak, Napster boasted a registered user base of 70 million [9] and 1.57 million simultaneous users. Now, after Napster's downfall, over 50 systems have taken its place. The files shared through these systems i ...
